**Social Networks - Do's and Don'ts**

- Only establish and maintain connections with people you know and trust. Review your connections often.
- Assume that ANYONE can see any information about your activities, personal life, or professional life that you post and share.
- Ensure that your family takes similar precautions with their accounts; their privacy and sharing settings can expose your personal data.
- Avoid posting or tagging images of you or your family that clearly show your face. Select pictures taken at a distance, at an angle, or otherwise concealed. **Never post Smartphone photos and don’t use your face as a profile photo, instead, use cartoons or avatars.**
- Use secure browser settings when possible and monitor your browsing history to ensure that you recognize all access points.

**Managing your Twitter Account**

Twitter is a social networking and microblogging site whose users send and read text-based posts online. The site surged to worldwide popularity with +300 million active users as of 2011, generating 300 million tweets and 1.6 billion search queries daily.

**Tweets**

"Tweets" are short text-based messages – up to 140 characters – that users post to Twitter. "Tweet" can refer to a post as well as to the act of posting to Twitter. Tweets are public, indexed, and searchable unless protected by the user. Many users never Tweet, choosing only to follow persons or topics of interest.

**Hashtags (#topic)** are used to mark a keyword or topic in a Tweet. Posts with hashtag are categorized by topics in the Twitter search engine. Hashtagged words that become popular become Trending Topics (ex. #jan25, #egypt, #ksxw).

**Mentions (@username)** are used to tag a user in a Twitter update. When a public user mentions a private Twitter account, the link to the private account profile becomes public.

**Profile Settings**

Apply the Profile settings shown below to ensure that your information is visible only to people of your choosing.

**Twitter Best Practices**

- Avoid using hashtags (#) in updates to avoid being indexed and associated with a topic by Twitter Search.
- Tweet responsibly. Do not provide personal details regarding your whereabouts and activities in your post.
- Do NOT upload links to personal photos or websites on Twitter.
- Do NOT allow Twitter to use your location on mobile devices.
- Change your Twitter username periodically to limit account exposure.
### Account Settings

Apply the Account settings shown below to ensure that your information is shared in a limited fashion.

#### Account
- **Username**: JasonSmith7825
- **Email**: jason.smith7825@yahoo.com
- **Language**: English
- **Time zone**: GMT-04:00 Atlantic Time (Ca)
- **Tweet location**: Add a location to my Tweets
- **Tweet media**: Display media that may contain sensitive content
- **Tweet privacy**: Protect my Tweets

#### Personalization
- **Tailor Twitter based on my recent website visits**: Preview suggestions tailored for you (not currently available to all users). Learn more about how this works and your additional privacy controls.

#### Notifications & Application Settings

Maintain a small digital footprint by minimizing the number of notifications. Revoke access to unnecessary third party applications.

#### Direct message (DM)
- Direct message (DM) is never visible to the public

#### Activity
- I'm followed by someone new
- My Tweets are marked as favorites
- My Tweets are retweeted

#### Updates
- Updates about new Twitter products, features, and tips
- Product or service updates related to my Twitter account
- A weekly digest of Stories & Tweets from my network

### Deactivating / Delete Your Twitter Account

To deactivate your account, go to Settings and select Account. At the bottom of the page, click “Deactivate my account.” After deactivation, the user can reactivate the account within 30 days. After 30 days, the account is permanently deleted.
